

We'll take care of your security *so you can take care of what matters most*

Fitting an alarm system will not only add peace of mind but will give an additional level of protection to your home and business.

Many people are put off by the high cost of some alarm systems and the mess associated with installation. Global Protection Services work closely with clients to design and implement a security system that meets their individual needs, within their budget and hassle free.

Protection for your home & your business

Your family and home/business are your most important assets in life and we understand your desire to keep them safe and secure. It is essential to put into place security measures that will protect family and staff members from intruders and fire. Our solutions specialise in protecting family homes and businesses.

GPS security solutions for your home & business:

- **Intruder Alarms**
Wireless installation using a fixed keypad or from a wireless fob allowing you to fully set or partially set from anywhere in the home. Emails or text message alerts are sent when specific sensors are activated.
- **Fire Detection**
Saving lives by protecting your home or business against fire. GPS fire detection systems can be integrated with intruder alarms and access control systems.

- **Property Entry Systems**
A wide range of audio and video entry systems available. Property Entry Systems can have one or multiple call buttons, keypad or proximity reader.

- **CCTV**
Acts as a deterrent, enabling you to see and record who is at your front door and view possible intruders in side alley ways. Access and view your home remotely through live video from anywhere in the world.

- **Key Holding**
Have total peace of mind and added security whether it is locking or unlocking your property or responding to alarm activations.

Response to Alarms *protection around the clock*

- GPS Security Officers are locally deployed and guarantee the quickest response to alarm activations.
- GPS takes care of homes and businesses while you are abroad.
- GPS Security Officers carry out checks for intruders, damage to property and signs of forced entry.
- GPS Security Officers liaise with the emergency services.

Security Control Room *providing nationwide coverage*

GPS's state of art security control room is a nerve centre which operates 24/7, 365 days a year providing quick response to events as they happen.

Total peace of mind
protect what you love

- Your security system comes with a minimum 2 year warranty.
- It is fully customisable to suit your needs and budget.
- Installed using the highest technical expertise.
- GPS security solutions can be integrated to enhance your existing security system.
- Access your home security remotely through live videoemail or text alerts.

Be proactive rather than reactive ...
act now and protect what you love

Your Security is Our Priority
Security solutions for your home & business

Thanks to GPS, I'm safe & secure!
